Gurugram Haryana

EXPERIENCE

Graduate Engineer Trainee

Ducat

01/2024 - 07/2024 Gurugram

Software training institute in Gurugram, Haryana

- I have expanded my expertise by learning full stack development through the MERN (MongoDB, Express.js, React.js, Node.js) stack. I am eager to apply this knowledge in a professional setting and contribute to projects that require both frontend and backend development skills.

Trainee

Techgyan

2023 Location

Training Provide

- In the one month training learn frontend technology. Using HTML, CSS, JAVASCRIPT and BOOTSTRAP.

PROJECTS

MY PROTFOLIO

2024 Gurugram

About Me

- <https://portfolio-gfapv8wn0-surya-yadavs-projects.vercel.app/>

Job Search

06/2024 - 08/2024 Gurugram

<https://github.com/SuryaYadav731/https---github.com-SuryaYadav731-Job-Search>

- I developed a major project using the MERN stack (MongoDB, React.js, Node.js) and Postman.
- The project is a job portal that allows job seekers to register, log in, and apply for jobs.
- On the other hand, employers can also register, log in, and create job postings.

Blood Bank

01/2024 - 04/2024 Gurugram

https://github.com/SuryaYadav731/blood_bank

- In my 8th semester, I developed a blood bank system using the MERN full stack.
- The project aims to ensure the availability of all blood groups, addressing the critical need for blood during emergencies.
- The website includes four categories: Donor, Admin, Organization, and Hospital, each with registration and login functionalities to manage and access blood resources efficiently
